Petition

To the Legislative Assembly of Ontario:

WHEREAS *Sabrina's Law, 2005* requires every Ontario school board to maintain an anaphylaxis policy and permits school employees to administer epinephrine to a pupil in an emergency, but does not apply to school vehicles, school bus drivers or the transportation consortia that operate them;

AND WHEREAS children with life-threatening allergies and other conditions ride school buses every school day, where the driver is the only adult present and most operators prohibit drivers from storing, handling or administering a pupil's rescue medication;

AND WHEREAS in 2026 a four-year-old Ontario child was injured when another pupil removed his epinephrine auto-injector from his backpack on a school bus and used it on him, because the only device on the bus had to remain in the child's own bag;

AND WHEREAS no provincial law, regulation or policy in Ontario establishes a standard for where rescue medication is kept on a school vehicle, who may access it, or what training the driver receives;

WE, THE UNDERSIGNED, PETITION THE LEGISLATIVE ASSEMBLY OF ONTARIO AS FOLLOWS:

To amend *Sabrina's Law, 2005* (to be known as **"Juju's Law"**) so that it: (1) applies to school vehicles and the operators and transportation consortia that provide pupil transportation; (2) requires that a pupil's prescribed rescue medication travel in a secure, clearly identified, driver-accessible location on the vehicle rather than in the pupil's possession; (3) requires annual training for school bus drivers in recognizing anaphylaxis and administering epinephrine; and (4) protects drivers who act in good faith from civil liability.
